Medical Aid and Response

468.1 PURPOSE AND SCOPE

This policy recognizes that members often encounter persons in need of medical aid and establishes a law enforcement response to such situations.

468.2 POLICY

It is the policy of the Indio Police Department that all officers and other designated members be trained to provide emergency medical aid and to facilitate an emergency medical response. Recognizing the urgency of providing medical aid and the importance of preserving human life, officers will request medical alert identification, if needed, and render appropriate medical aid within the scope of their training. A call for medical aid is not required for apparent injuries that can be treated by basic first aid (e.g. minor cuts and abrasions).

468.3 FIRST RESPONDING MEMBER RESPONSIBILITIES

Whenever practicable, members should take appropriate steps to provide initial medical aid (e.g., first aid, CPR, use of an automated external defibrillator (AED)) in accordance with their training and current certification levels. This should be done for those in need of immediate care and only when the member can safely do so.

Prior to initiating medical aid, the member should contact the Dispatch Center and request response by Emergency Medical Services (EMS) as the member deems appropriate.

Members should follow universal precautions when providing medical aid, such as wearing gloves and avoiding contact with bodily fluids, consistent with the Communicable Diseases Policy. Members should use a barrier or bag device to perform rescue breathing.

When requesting EMS, the member should provide the Dispatch Center with information for relay to EMS personnel in order to enable an appropriate response, including:

(a) The location where EMS is needed.
(b) The nature of the incident.
(c) Any known scene hazards.
(d) Information on the person in need of EMS, such as:
   1. Signs and symptoms as observed by the member.
   2. Changes in apparent condition.
   3. Number of patients, sex, and age, if known.
   4. Whether the person is conscious, breathing, and alert, or is believed to have consumed drugs or alcohol.
5. Whether the person is showing signs or symptoms of excited delirium or other agitated chaotic behavior.

Members should stabilize the scene whenever practicable while awaiting the arrival of EMS.

(a) After requesting a medical aid response, officers will render aid within the scope of their training unless aid is declined or it is unsafe to do so.

(b) Consent should be assumed for unconscious subjects or subjects incapable of providing consent.

Members should not direct EMS personnel whether to transport the person for treatment.

468.4 TRANSPORTING ILL AND INJURED PERSONS

Except in extraordinary cases where alternatives are not reasonably available, members shall not transport persons who are unconscious, who have serious injuries or who may be seriously ill. EMS personnel should be called to handle patient transportation.

Officers should search any person who is in custody before releasing that person to EMS for transport.

An officer should accompany any person in custody during transport in an ambulance when requested by EMS personnel, when it reasonably appears necessary to provide security, when it is necessary for investigative purposes or when so directed by a supervisor.

Members should not provide emergency escort for medical transport or civilian vehicles unless approved by a supervisor.

468.5 PERSONS REFUSING EMS CARE

If a person who is not in custody refuses EMS care or refuses to be transported to a medical facility, an officer shall not force that person to receive care or be transported. However, members may assist EMS personnel when EMS personnel determine the person lacks mental capacity to understand the consequences of refusing medical care or to make an informed decision and the lack of immediate medical attention may result in serious bodily injury or the death of the person.

In cases where mental illness may be a factor, the officer should consider proceeding with a 72-hour treatment and evaluation commitment (5150 commitment) process in accordance with the Mental Illness Commitments Policy.

If an officer believes that a person who is in custody requires EMS care and the person refuses, he/she should encourage the person to receive medical treatment. The officer may also consider
 contacting a family member to help persuade the person to agree to treatment or who may be able to authorize treatment for the person.

If the person who is in custody still refuses, the officer will require the person to be transported to the nearest medical facility. In such cases, the officer should consult with a supervisor prior to the transport.

Members shall not sign refusal-for-treatment forms or forms accepting financial responsibility for treatment.

468.6 MEDICAL ATTENTION RELATED TO USE OF FORCE

Specific guidelines for medical attention for injuries sustained from a use of force may be found in the Use of Force, Handcuffing and Restraints, Control Devices and Techniques, and Conducted Energy Device policies.

468.7 AIR AMBULANCE

Generally, when on-scene, EMS personnel will be responsible for determining whether an air ambulance response should be requested. An air ambulance may be appropriate when there are victims with life-threatening injuries or who require specialized treatment (e.g., gunshot wounds, burns, obstetrical cases), and distance or other known delays will affect the EMS response.

The Field Services Division Chief should develop guidelines for air ambulance landings or enter into local operating agreements for the use of air ambulances, as applicable. In creating those guidelines, the Department should identify:

- Responsibility and authority for designating a landing zone and determining the size of the landing zone.
- Responsibility for securing the area and maintaining that security once the landing zone is identified.
- Consideration of the air ambulance provider’s minimum standards for proximity to vertical obstructions and surface composition (e.g., dirt, gravel, pavement, concrete, grass).
- Consideration of the air ambulance provider’s minimum standards for horizontal clearance from structures, fences, power poles, antennas or roadways.
- Responsibility for notifying the appropriate highway or transportation agencies if a roadway is selected as a landing zone.
- Procedures for ground personnel to communicate with flight personnel during the operation.

One department member at the scene should be designated as the air ambulance communications contact. Headlights, spotlights and flashlights should not be aimed upward at the air ambulance. Members should direct vehicle and pedestrian traffic away from the landing zone.
Members should follow these cautions when near an air ambulance:

- Never approach the aircraft until signaled by the flight crew.
- Always approach the aircraft from the front.
- Avoid the aircraft’s tail rotor area.
- Wear eye protection during landing and take-off.
- Do not carry or hold items, such as IV bags, above the head.
- Ensure that no one smokes near the aircraft.

468.8 AUTOMATED EXTERNAL DEFIBRILLATOR (AED) USE

A member may use an AED only after receiving appropriate training from an approved public safety first aid and CPR course (22 CCR 100014; 22 CCR 100017; 22 CCR 100018).

468.8.1 AED USER RESPONSIBILITY

Members who are issued AEDs for use in department vehicles should check the AED at the beginning of the shift to ensure it is properly charged and functioning. Any AED that is not functioning properly will be taken out of service and given to the Training Coordinator who is responsible for ensuring appropriate maintenance.

Following use of an AED, the device shall be cleaned and/or decontaminated as required. The electrodes and/or pads will be replaced as recommended by the AED manufacturer.

Any member who uses an AED should contact the Dispatch Center as soon as possible and request response by EMS.

468.8.2 AED REPORTING

Any member using an AED will complete an incident report detailing its use.

468.8.3 AED TRAINING AND MAINTENANCE

The Training Coordinator should ensure appropriate training and refresher training is provided to members authorized to use an AED. A list of authorized members and training records shall be made available for inspection by the local EMS agency (LEMSA) or EMS authority upon request (22 CCR 100021; 22 CCR 100022; 22 CCR 100029).

The Training Coordinator is responsible for ensuring AED devices are appropriately maintained and will retain records of all maintenance in accordance with the established records retention schedule (22 CCR 100021).

468.8.4 RESPONDING TO MEDICAL AID, CARDIAC ARREST, OR CPR IN PROGRESS
Medical Aid and Response

These guidelines apply to all sworn personnel;

a. Personnel with proper certification and current training shall perform CPR when feasible during the scope of their law enforcement duties and when dispatched to a medical aid where such life saving measures are needed pending the arrival of medical aid.

b. If an “on view” situation occurs, the officer will advise communications via police radio or direct another person to call 9-1-1 in order to request a (CDF) California Department of Forestry medical response.

c. Upon the arrival of CDF Paramedics, patients care will be transferred to CDF Paramedics in the same manner that other medical or traumatic injury cases are handled.

468.9 SICK OR INJURED ARRESTEE

Best Practice MODIFIED

If an arrestee appears ill or injured, or claims illness or injury, they should be medically cleared prior to booking at a local hospital (JFK Hospital). If the officer has reason to believe the arrestee is feigning injury or illness, the officer should contact a supervisor, who will determine whether medical clearance will be obtained prior to booking.

If the jail or detention facility refuses to accept custody of an arrestee based on medical screening, the officer should note the name of the facility person refusing to accept custody and the reason for refusal, and should notify a supervisor to determine the appropriate action.

Arrestees who appear to have a serious medical issue should be transported by ambulance. Officers should not transport an arrestee to a hospital without a supervisor’s notification.

Nothing in this section should delay an officer from requesting EMS when an arrestee reasonably appears to be exhibiting symptoms that appear to be life threatening, including breathing problems or an altered level of consciousness, or is claiming an illness or injury that reasonably warrants an EMS response in accordance with the officer’s training.

468.10 FIRST AID TRAINING

State MODIFIED

The Police Training Specialist should ensure officers receive initial first aid training within one year of employment and refresher training every two years thereafter (22 CCR 100016; 22 CCR 100022) per POST guidelines in order to ensure compliance. In addition, the Police Training Specialist shall maintain a current log of all CPR certified sworn staff.
