TEMPORARY CLOSURE OF SOUTH PARKING LOT AT DR. CARREON
PARK AND ALTERNATIVE PARKING

INDIO, CA (Nov. 20, 2018) - Indio Water Authority (IWA) is pleased to announce the rehabilitation and redevelopment of Well 3B, which is located at Dr. Carreon Park. Projects such as this ensure long-term well performance and reliability of your water supply.

To ensure the safety of the public and accommodate heavy equipment for the project, the front parking lot (South Parking Lot) will be closed from October 15 through December 31. Alternative parking is available on the Northeast Parking Lot on Daisy Street (see Map for Direction). Please note that the park remains OPEN to the public throughout the construction period.

Please contact the Water Operations Superintendent, Miguel Pena at (760) 625-1852 or mpena@indio.org if you have questions or concerns regarding this project.

About Indio Water Authority:
Indio Water Authority (IWA) was formed in 2000 to efficiently deliver safe reliable water to residents, visitors and businesses in the City of Indio. IWA currently supplies water to approximately 23,000 commercial and residential customers comprised of 88,411 residents in a 38-square mile service area.

IWA pumps water from 20 groundwater wells to supply customers. Wells vary in depth from 1,200 to 2,000 feet and flow rate of 1,200 to 3,500 gallons per minutes. Each day, these wells produce an average of 16 million gallons to meet City’s water demand. Well performance can degrade over time. Typical causes of well degradation include mineral and bacterial incrustation of the well screen; physical plugging of the well screen, filter pack, and surrounding soils by fine particles; corrosion of the well casing; and pump problems. That is why Indio Water Authority invest in preventive maintenance to ensure well performance and reliability of your water supply.
